

I am opposed to the passage of 04-233 which would give LPFM stations priority over existing translator services. Specifically, K-LOVE FM is the only station of it's type in our community. This Christian Music broadcast is one of only two stations which are totally safe for listeners of all ages, 24 hours a day and the only one with a Contemporary format. It's loss as a result of this legislation would deprive our community of great benefit as well as an appropriate alternative to other programming. It is in the public interest to preserve stations of this nature which offer wholesome, family-friendly programming in a broadcast environment which seems to be dominated more and more by stations offering content which is either extreme, offensive and/or vulgar. I urge you not to make changes which would narrow our programming options more than they already are.

Thank you,  
Dave Welch
